

Electric Kettle for Boiling Water

This electric kettle is designed for quickly boiling water. It is suitable for making tea, coffee, and other hot beverages.

Product Overview

High Voltage Dropout Fuse Cutout

This high voltage dropout fuse cutout serves as a critical protective device for electrical power distribution systems. Designed for outdoor use, it effectively safeguards transformers and distribution lines from overloads and short circuits by isolating faults when the fuse link melts. Its robust construction ensures reliable performance even in harsh environmental conditions.

Technical Specifications

Application	Outdoor electrical power distribution systems
Primary Function	Overload and short circuit protection
Key Features	High interrupting capacity, Corrosion resistance, Easy fuse replacement

Usage

Typical Equipment Protected

- Transformers
- Capacitors
- Overhead distribution lines
