

Electric Lamp Holder

This device mechanically supports and provides electrical connections for an electric lamp. It features robust construction and is designed for secure and reliable lamp installation.

Product Overview

Reliable Electric Lamp Holder

This electric lamp holder is designed to provide secure mechanical support and reliable electrical connections for standard light bulbs. Constructed with durable ABS material and featuring high-quality copper parts, it ensures long-lasting performance. The inclusion of an aluminum lamp coil and a spring mechanism facilitates easy and stable lamp installation for various lighting applications.

Material & Construction

Housing Material	ABS
Internal Components	Copper parts, Aluminum lamp coil

Technical Features

Design Highlights

- Robust construction
- Secure lamp installation
- Easy wiring connections

Installation Mechanism	Yes
