Product Overview

High-Performance Lifting Solution

The JL-II series electric lifting winch is engineered from high-strength aluminum alloy with an anodized finish, providing excellent heat dissipation and a lightweight, durable design. Featuring closed gear oil lubrication, this unit operates with low noise, minimal wear, and reduced transmission loss. It is a versatile tool suitable for construction, agriculture, freight elevators, and catering industries, functioning effectively as a standalone winch or integrated with small cranes.

Technical Specifications

Performance Benefits

- Low noise operation
- Low wear components
- Low transmission loss
- Excellent heat dissipation

Material & Build

Aluminum Alloy, Anodized Finish, High-Strength, Lightweight

Lubrication Type

Closed gear oil lubrication

Operational Features

Safety Mechanisms

Emergency Stop • Overload Protection • Safety Latch Hook

Control System

Handheld control pendant with emergency stop button

Applications

Suitable Industries

- Construction Industry
- Agriculture
- Freight Elevators
- Catering Industry
- Workshops
