

Electric Material Cutting and Bending Machine

This electric machine is designed for precise and efficient cutting and bending of various materials. It features a robust motor, adjustable cutting depth, and a stable base for accurate operation.

Overview

Versatile Cutting and Bending Solution

This electric material cutting and bending machine is engineered for precision and efficiency in material processing. Featuring a robust motor and an adjustable cutting depth, it ensures clean, smooth cuts across various materials. Designed with a stable base, safety guard, and ergonomic handle, this tool balances professional-grade performance with user safety and comfort.

Technical Specifications

Model Number	XS-110
Power Source	Electric

Features

Operational Benefits

- Adjustable cutting depth
- Stable base for accuracy
- Clean and smooth cuts
- Minimal effort operation

Safety Features	Safety Guard, Ergonomic Handle
