

Electric Meat Grinder with 600W Motor

This electric meat grinder is equipped with a 600W motor and an on-off reverse switch. It features a die-cast grinder head and includes three cutting discs for different grinding consistencies.

Product Overview

Professional Performance in a Compact Design

This electric meat grinder is engineered for efficient food processing, featuring a robust 600W motor suitable for home and small-scale commercial use. The unit is built with a durable die-cast grinder head and a sharp cross knife, ensuring consistent grinding performance. With its versatile accessory set, including sausage fillers and multiple cutting discs, this appliance is a reliable solution for various culinary preparation tasks.
