

Electric Meat Grinder with Reverse Function

This electric meat grinder is equipped with a transparent feeding tray and a stainless steel grinding head. It features an on/off/reverse switch for operational convenience and is designed for home use.

Product Overview

High-Performance Electric Meat Grinder

This electric meat grinder is designed for efficient and reliable food preparation, featuring a powerful motor capable of handling large volumes of meat with ease. It includes a convenient reverse function to prevent jamming and ensures smooth operation during processing. With durable stainless steel blades and detachable aluminum die-cast parts, this appliance is built for both performance and easy maintenance.

Key Features
