Product Overview

Professional Electric Metal Shear

This electric metal shear is engineered for efficient and precise cutting of general steel plates. It delivers a clean, burr-free cutting edge without generating sparks, ensuring a safer and more refined workflow. Designed for longevity and value, the cutting blades can be machined and renewed for reuse, maintaining consistent cutting performance over time.

Technical Specifications

Max Cutting Thickness

2.5 mm

Steel Plate

Cutting Capabilities

- Burr-free cutting edges
- Spark-free operation
- Suitable for general steel plate

Maintenance & Design

Blade Maintenance

Yes

Blade Features

Re-sharpenable, Reusable, Durable

Certifications

Compliance

CE
