Product Overview

Professional Electric Metal Shears

These professional-grade electric metal shears are engineered for precision and efficiency in metalworking environments. Designed to smoothly cut general steel plate up to 3.5mm thick, the tool delivers a clean, burr-free edge without generating sparks. The durable cutting blade is designed for easy maintenance, allowing for machining to renew the blade for extended service life.

Technical Specifications

Max Cutting Thickness	3.5 mm
Cutting Capabilities	General Steel Plate, Burr-free edges, Spark-free operation
Maintenance	Remachinable blades for extended reuse

Design & Ergonomics

Design Features

- Robust construction
- Vertical handle for stability
- Side handle for enhanced control
- Ergonomic grip

Suitable Applications

Metalworking • Construction • Automotive
