

Electric Misting Fan with Adjustable Height

This electric misting fan combines a circular fan head with a misting function for enhanced cooling. It features an adjustable pole and a mobile base with a water level indicator.

Product Overview

Advanced Misting Technology

This electric misting fan combines powerful ventilation with efficient humidification to create a comfortable environment. Featuring a robust full-copper motor and three distinct wind modes, it offers customizable cooling for various settings. With its integrated water tank, adjustable height, and convenient mobility castors, this unit is designed for both performance and ease of use.

Technical Specifications

Power Consumption

65 W Fan Power	35 W Humidifier Power	100 W Total Power
