

Electric Motor for Fan and Exhaust Systems

This electric motor is designed for use in fans and exhaust systems. It is suitable for household electrical appliances, specifically air conditioners and ventilation equipment.

Product Overview

High-Performance Ventilation Motor

This electric motor is engineered specifically for reliable operation in fan and exhaust systems. Its robust, cylindrical design includes a secure mounting bracket, ensuring stable installation in various air conditioning and ventilation units. Designed for durability and ease of use, it features a heavy-duty power cord, making it an ideal component for household and commercial electrical appliances.

Technical Specifications

Design Features

- Cylindrical housing
- Integrated mounting bracket
- Heavy-duty power cord
- Standard plug connection

Color

Black

Primary Application

Air Conditioning, Ventilation Equipment, Exhaust Systems, Electric Fans
