

Electric Motor for Industrial Machinery

This general-purpose electric motor is suitable for a variety of industrial and agricultural applications. It features a durable housing, shaft protector, and ventilation for cooling.

Overview

Industrial Electric Motor

This general-purpose electric motor is engineered for reliable performance in diverse industrial and agricultural environments. Featuring a robust blue-painted housing and a secure mounting base, it is designed for durability and longevity. The unit includes integrated ventilation for effective cooling during continuous operation and a standard connection point for straightforward electrical integration.

Physical Characteristics

Housing Color	Blue
Safety Features	Yellow shaft protector, Warning label included

Technical Specifications

Cooling System	Yes
Mounting	Base-mounted
