

Electric Motor for Textile Machinery

This electric motor is designed for use in textile machinery. It features a finned housing for heat dissipation and a shaft for power transmission.

Product Overview

Industrial Efficiency for Textile Operations

This three-phase induction electric motor is engineered specifically for demanding textile machinery environments. Featuring a robust housing with integrated cooling fins, it ensures optimal heat dissipation and sustained operational performance during continuous production cycles. Designed for industrial-grade power transmission, this motor provides the reliability necessary for high-speed textile manufacturing equipment.

Technical Specifications

Target Industry

Textile Manufacturing

Motor Type

Three-phase induction motor

Design Features

Finned Housing, Heat Dissipation, Industrial Grade, Textile Machinery Compatible
