

# Electric Motor Generator Unit

This electric motor generator unit features a durable grey housing and multiple cable connections. The unit incorporates a cylindrical output shaft, designed for heavy-duty applications.

## Product Overview

### Industrial Electric Motor Generator Unit

This robust electric motor generator unit is engineered for demanding industrial environments, featuring a durable grey housing designed for longevity and performance. The unit incorporates a cylindrical output shaft optimized for heavy-duty applications, ensuring reliable power transmission. With multiple integrated cable connections, it offers versatile installation options for complex machinery and power systems.

## Physical Specifications

Housing Color	Grey
Output Shaft Type	Cylindrical
Application Suitability	Industrial, Heavy-duty, Motor-Generator

## Connectivity

Connection Interface	Multi-cable configuration
