

Electric Motorcycle with Anti-Theft Lock

This electric motorcycle has a sleek silver design with black accents. It features a rear tail light, anti-theft door lock, and under-seat battery compartment compatible with a 48V20AH battery.

Overview

Modern Electric Mobility

This electric motorcycle combines sleek aesthetics with practical urban features, designed for efficient daily commuting. It includes essential security enhancements like an anti-theft ignition lock and a robust rear tail light for visibility. The under-seat compartment is specifically engineered to house a 48V20AH battery, ensuring a clean and integrated power solution.
