Overview

High-Performance Electric Mountain Bike

This electric mountain bike is engineered for demanding off-road adventures, featuring a robust 6061 aluminum frame and a full suspension system for superior comfort. Powered by a 500W mid-drive motor and a 48V lithium-ion battery, it provides consistent power for challenging climbs and extended trail rides. With high-end components like hydraulic disc brakes and an 8-speed drivetrain, this bike offers both reliability and agility on diverse terrains.
