

Electric Mountain Bike with Lithium Battery

This electric mountain bike is powered by a lithium battery system, ideal for both off-road and urban environments. It features front suspension forks, disc brakes, and a multi-speed drivetrain.

Overview

Versatile Electric Mountain Bike

This electric mountain bike is engineered for both rugged off-road trails and efficient urban commuting. It features a reliable lithium battery power system integrated into a durable frame designed for longevity. Equipped with essential components like front suspension, disc brakes, and a multi-speed drivetrain, it offers a balanced ride for various terrains.

Technical Specifications

Power System	Lithium Battery
Suspension	Front suspension forks
Braking System	Disc brakes
Drivetrain	Multi-speed

Features

Included Accessories

- Water bottle holder
- Fenders

Recommended Use	Off-road, Urban commuting
