

Electric Mountain Bike with Lithium Battery

This electric mountain bike features a robust frame and a powerful lithium battery for extended range. It is equipped with disc brakes and front suspension for reliable stopping power and a comfortable ride.

Overview

High-Performance Electric Mountain Bike

This electric mountain bike is engineered for versatility, seamlessly transitioning between urban commuting and rugged off-road adventures. It features a robust frame paired with front suspension to ensure a comfortable ride across varied terrains. With a powerful, rear-mounted lithium battery, riders can enjoy an extended range, while integrated safety features like disc brakes and lights provide confidence and visibility in all conditions.
