

Electric Multi-Function Pressure Cooker

This electric pressure cooker features an eight-fold safety protection system. It precisely controls nutrient programs to fully release all nutrients contained in the food.

Product Overview

Professional Multi-Function Cooking

This electric pressure cooker is designed for efficient, nutrient-focused meal preparation. Featuring an automated pressure control system, it ensures optimal flavor extraction for stewing, simmering, and braising. The robust stainless steel construction and double-coated inner liner offer both durability and ease of maintenance for high-volume or professional kitchen environments.
