

Electric Outdoor Grill with Temperature Control

This electric barbecue grill features a dome-shaped lid and a circular grilling surface with ventilation holes. It is supported by a four-legged base and includes a temperature control knob.

Product Overview

Professional Electric Barbecue Solution

This stylish stand grill is designed for efficient outdoor cooking, featuring a large 39cm aluminum plate and a 34cm grid diameter. Engineered for convenience, it includes a lid for optimized heat retention and a continuously adjustable thermostat for precise temperature control. The removable components and galvanized drip tray ensure easy cleaning, making it an ideal choice for balconies, patios, and compact outdoor dining spaces.
