

Electric Pallet Stacker

This electric pallet stacker is designed for lifting and transporting heavy loads. It features a robust construction and a user-friendly control system.

Overview

High-Efficiency Electric Stacker

The Electric Stacker is a versatile material handling solution engineered for lifting and transporting heavy loads in demanding warehouse and industrial environments. Featuring a robust construction and an intuitive, user-friendly control system, it ensures reliable performance and operator safety. This equipment is designed to optimize workflow efficiency, making it an essential asset for modern logistics and storage facilities.

Performance

Load Capacities

- 1000
- 1500
- 2000

Available Lift Heights

1.6m, 2.5m, 3m, 3.5m

Technical Details

Model Variants

CDD10H • CDD15H • CDD20H

Capacity Reference

1000 kg
Base Capacity

1500 kg
Mid Capacity

2000 kg
Max Capacity
