

# Electric Pallet Truck for Warehouse Material Handling

This electric pallet truck is designed for efficient material handling in warehouse environments. Features include regenerative braking, an anti-slip function, and a 5-fulcrum design for enhanced stability.

## Overview

### High-Performance Material Handling

This electric pallet truck is engineered for efficient and reliable warehouse logistics operations. It features advanced AC driving technology, regenerative braking, and a stable 5-fulcrum design to ensure operator safety and smooth handling. With high-capacity lift capabilities and robust construction, it is an ideal solution for intensive material transport needs.

## Performance

### Key Performance Indicators

<b>2500 kg</b> Max Rated Capacity	<b>5 km/h</b> Max Traction Speed	<b>15 %</b> Max Grade Ability
--------------------------------------	-------------------------------------	----------------------------------

## Technical Parameters

### Detailed Technical Specifications

Feature	CBD-20N	CBD-25N
Rated Capacity (kg)	2000	2500
Max Lift Height (mm)	200	200
Turning Radius (mm)	1530	1530
Traction Motor	1.5Kw/24V	1.5Kw/24V
Lift Motor	2.2Kw/24V	2.2Kw/24V

## Safety & Features

### Key Safety & Functional Features

Regenerative braking, Ramp anti-slide function, Emergency power-off switch, 5-fulcrum stability design, Maintenance-free AC motor
