

# Electric Pantograph Reach Stacker 1500kg Capacity

This electric pantograph reach stacker has a 1500kg capacity. Its pantograph mechanism allows for reaching into racking systems, maximizing storage utilization.

## ADDITIONAL IMAGES

## Overview

### High-Efficiency Reach Stacker

This fully electric pantograph reach stacker is designed for heavy-duty warehouse operations, featuring a 1500kg capacity and a 600mm pantograph reach for double-deep pallet handling. Engineered for efficiency and safety, it includes advanced features like electric power steering, automatic cornering speed control, and a reliable hydraulic system. It is an ideal solution for maximizing productivity in narrow aisle environments.

## Performance

Load Capacity	1500 kg
Maximum Lift Height	4.5 m
Pantograph Reach	600 mm
Safety Speed Control	Automatic decline to 2km/h when forks over 500mm or free lift finished

## Technical Features

### Operational Features

- Pantograph reach for double-deep pallet handling
- Side pull battery replacement design
- Moonwalk STD one button shift
- Variable speed control on all functions

### Key Components

AC Drive Motor, Electric Power Steering, Hydr-App Hydraulic Pump, ZF Transmission

## Safety

### Integrated Safety Systems

Lifting height limitation switch • Cornering speed control • Warning lights • Beeper included • Emergency stop • Automatic braking
