

# Electric Pasta Maker for Fettuccine

This electric pasta maker simplifies fresh fettuccine creation. It features a motorized drive for automated pasta production, ensuring uniform thickness and texture.

## ADDITIONAL IMAGES

## Product Overview

### Versatile Fresh Pasta Production

This industrial-grade electric pasta machine is designed for efficient, consistent pasta production. It features a dual-mode operation system, allowing users to switch seamlessly between manual and motorized modes. With its robust motor and adjustable settings, it is capable of producing a variety of pasta shapes, including Lasagne, Tagliatelle, Spaghetti, and Taglierini.

## Technical Specifications

### Motor Power

**90 W**

Motor Power

### Electrical Requirements

Parameter	Value
Supply Voltage	110/220V
Frequency	50/60Hz

## Operational Features

### Operation Mode

- Manual operation
- Motorized electric operation

### Compliance

FDA

### Supported Pasta Shapes

Lasagne, Tagliatelle, Spaghetti, Taglierini, Fettuccine
