

Electric Pipe Cutting and Threading Machine

The electric pipe cutting and threading machine is a versatile tool for efficiently cutting and threading pipes. It features a robust construction ensuring durability and precision during operation.

Overview

Professional Pipe Processing Solution

This electric pipe cutting and threading machine is a versatile, high-performance tool engineered for efficient pipe preparation. Built with a robust construction for long-term durability, it features a powerful motor and an adjustable system to handle various pipe sizes with precision. The design prioritizes user safety and ease of maintenance, making it an ideal choice for demanding industrial and construction environments.

Technical Features

Key Features

- Adjustable cutting speed
- Automatic lubrication system
- Built-in safety mechanism
- Versatile threading die range

Construction

Robust Design • Precision Engineered

Certifications
