

Electric Plate Compactor

This compaction machine is designed for construction and landscaping. It features an electric motor and durable steel base plate for soil and asphalt compaction.

Overview

High-Performance Electric Compaction

This electric plate compactor is a robust and efficient machine engineered for diverse construction and landscaping requirements. Designed with a durable steel base plate and a powerful electric motor, it delivers consistent performance for soil, asphalt, and trench compaction. Its compact footprint ensures excellent maneuverability, making it an ideal solution for working in confined spaces and preparing foundations.

Technical Specifications

Power Source	Electric Motor
Suitable Applications	Soil Compaction, Asphalt Finishing, Trench Compaction, Foundation Preparation

Design Features

Operational Features

- User-friendly handle system
- Intuitive control system
- Compact design for confined spaces
- High maneuverability

Base Plate Material	Durable Steel
