

Electric Pole Saw for Tree Pruning

This electric pole saw is designed for efficient tree pruning and branch cutting. Its lightweight construction includes an adjustable chain bar, easy oil tank cap, and a structure designed with a 15-degree angle for enhanced cutting.

Product Overview

Professional Electric Pole Saw

This electric pole saw is engineered for efficient and safe tree pruning, featuring a lightweight design that reduces strain during extended use. The unit incorporates an innovative ellipse-shaped glass fiber tube, significantly lowering the weight from 5.6kg to just 3.9kg. Designed with the professional in mind, it includes advanced features such as adjustable handle angles, quick-release harness systems, and optimized motor cooling for durability.

Physical Characteristics

Weight Reduction

5.6 kg

Original Weight

3.9 kg

Optimized Weight

Tube Construction

Ellipse-shaped glass fiber

Portability Features

Separable lower tube, Compact packaging

Performance & Ergonomics

Ergonomic Features

- Soft handgrip area
- Adjustable shoulder strap locations
- Quick-release harness button
- Lock-off safety switch

Handle Adjustment Range

-18 to 36 degrees

Cutting Angle Design

15 degrees

Operational Features

Maintenance & Operational Aids

- Quickly adjustable chain bar tension
- Easy-access oil tank cap
- Wide slot for debris and sawdust removal
- Extension cord retainer for strain relief

Large Air Inlet Cooling

Yes

Branch Catching Hook

Yes
