

Electric Police Patrol Vehicle

This electric police patrol vehicle is designed for efficient and eco-friendly patrolling. The vehicle has a net weight of 800kg and is powered by a 3kW motor.

Overview

Efficient Patrol Solution

This electric police patrol vehicle offers a compact and eco-friendly solution for security and patrol operations. Designed for agility, it features a 3kW motor and a robust lead-acid battery system, ensuring reliable performance in various patrol environments. With a capacity for 4 riders and a 30% climbing capability, it is well-suited for maneuvering through urban spaces and patrol routes.
