

# Electric Portable Telescopic Belt Conveyor for Loading and Unloading

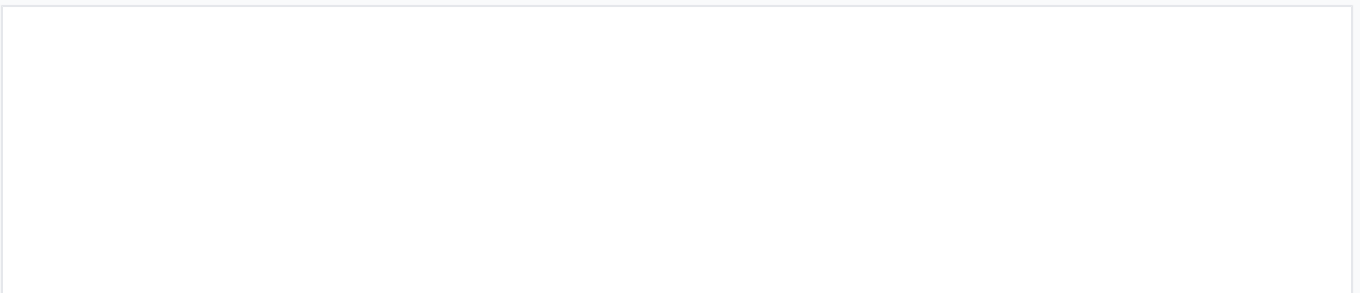

This electric portable telescopic belt conveyor is designed for automatic loading and unloading of goods. Its telescopic design allows for adjustable length to accommodate various loading and unloading scenarios.

## ADDITIONAL IMAGES

## Overview

Portable telescopic conveyor designed for efficient loading and unloading from transport vehicles.

### Efficient Material Handling Solution

This electric portable telescopic belt conveyor is engineered to streamline loading and unloading processes in industrial environments. Featuring a robust, adjustable telescopic design, it offers flexible reach to accommodate various transport vehicles and facility layouts. The system is built for durability and reliability, incorporating safety features and motorized components to enhance operational efficiency and reduce manual labor.

## Key Features

Conveyor assembly featuring adjustable height supports and high-visibility safety guards.

### Safety Components

Emergency Stop • Guardrails • Safety Guards

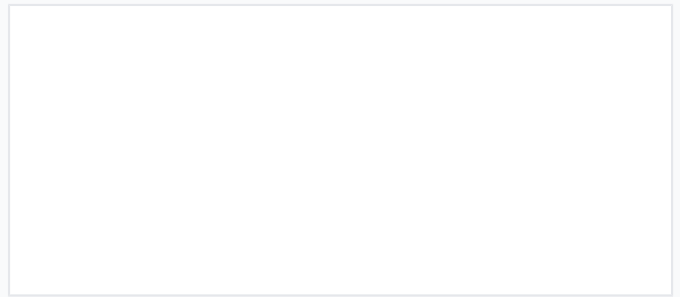

### Operational Capabilities

Telescopic Extension, Electric Powered, Portable Design, Adjustable Height, Automatic Loading/Unloading

## Technical Specifications

Integrated belt and roller conveyor system with yellow safety guards for enhanced workplace security.

Robust telescopic conveyor system equipped with an electric motor for reliable, automated operation.

### System Components

- Belt Conveyor Section
- Roller Conveyor Section
- Electric Motor Drive
- Adjustable Support Stands
- Control Panel

### Design & Construction

Feature	Description
Frame Material	Robust Metal
Belt Type	Corrugated Sidewall
Mobility	Portable / Flexible
Adjustment	Telescopic Length & Height

## Applications

### Suitable Industries

Logistics, Warehousing, Manufacturing, Food & Beverage, Distribution Centers

## Certifications

Manufacturing quality management system certification.

**Quality Compliance**  
ISO 9001:2000
