

Electric Power Blower for Debris Clearing

This electric power blower is designed for clearing debris and dust. It features a handle for easy grip and a nozzle for directing airflow.

Product Overview

High-Efficiency Debris Clearing

This electric power blower is designed for effective debris and dust removal in professional environments. Featuring a compact, ergonomic design with a secure handle, it provides controlled airflow for precise cleaning tasks. Its corded power source ensures consistent, reliable performance for continuous operation.

Technical Specifications

Power Source	Electric Corded
Primary Application	Debris Clearing, Dust Removal, Surface Cleaning

Design Features

Design Type

Compact • Handheld

Ergonomics

- Integrated handle for easy grip
- Directional nozzle for precise airflow
