

Electric Power Drill

This electric drill is designed for various drilling applications. It features durable construction and an ergonomic design for comfortable handling.

Overview

Versatile Electric Power Drill

This electric power drill is designed for high-performance drilling across multiple materials, including steel and wood. It features a variable no-load speed range for precise control and a generous power supply cord for enhanced mobility in professional workspaces. Its ergonomic design ensures comfortable handling during extended use, making it an essential tool for various industrial and DIY applications.

Performance Metrics

Key Performance Metrics

285 W

Power Input

3500 r/min

Max Speed

10 mm

Chuck Capacity

Technical Specifications

No Load Speed	0-3500 r/min
Power Input	285 W
Power Supply Cord	2.8 m

Drilling Capacity

Maximum Drilling Capacities

Material	Capacity
Steel	10mm
Wood	18mm

Hardware Details

Chuck Capacity	10 mm
