

Electric Power Drill for Wood Metal and Concrete

This electric drill is designed for demanding applications. It is suitable for drilling in various materials including wood, metal, and concrete.

Product Overview

Versatile Power Performance

This heavy-duty electric drill is engineered for demanding professional applications, offering high torque and efficient performance across various materials. Designed for versatility, it excels in screw-up tasks, drilling, putty application, coating, painting, and even concrete mixing. With a robust motor and ergonomic design, it is built to support high tool requirements and long working sessions in challenging environments.

Technical Specifications

Key Features

- Variable speed control
- High torque motor
- Ergonomic handle design
- Durable chuck for secure bit retention

Application Types

Drilling • Screwdriving • Concrete Mixing • Surface Coating

Supported Materials

Wood, Metal, Concrete
