Overview

Professional Power Generation

This 100KVA diesel generator set is engineered for reliability in demanding industrial, construction, and commercial environments. The unit features a sound-attenuated enclosure for quiet operation, making it suitable for noise-sensitive locations like hospitals and hotels. Equipped with an advanced integrated controller, it provides stable power output and automated monitoring for both prime and standby applications.

Performance

Rated Power

100 KVA
Power Capacity

60 HZ
Frequency

Operational Features

Silent Operation, Compact Structure, Large Power Margin, Stable Performance

Technical Specifications

System Design

- Sound-attenuated enclosure
- Integrated SmartGen control system
- Emergency stop safety mechanism
- Automatic start/stop functionality
- Overload protection

Suitable Applications

Industrial • Construction • Agricultural • Healthcare Facilities • Hospitality • Residential
