Product Overview

Efficient Electric Material Handling

This electric power mini dumper is designed for versatile material transport across construction sites, farms, and gardens. By utilizing a battery-powered system instead of traditional engines, it provides a zero-emission, low-noise solution for moving heavy loads like sand, stones, wood, and crops. Its compact design ensures easy maneuverability even in confined spaces, while the electric drive offers long endurance and low energy consumption.

Performance Specifications

Maximum Loading Capacity

400 kg

Max Load

Power System

Electric Battery

Operational Benefits

Zero Emission, Zero Noise, Low Energy Consumption, Long Endurance

Design & Utility

Suitable Applications

- Construction sites
- Landscaping
- Agricultural use
- Gardening
- Material transport

Design Features

Wheel Drive • Compact Design • Easy Operation
