

Electric Powered Tricycle with Baskets

This electric tricycle is equipped with a high-speed motor and large-capacity battery. It features a step-through frame, front basket, and large rear basket for convenient transportation.

Product Overview

Electric Powered Tricycle

This electric tricycle is designed for comfortable and convenient transportation, featuring a stable three-wheel design for optimal balance. It includes a convenient step-through frame for easy mounting, alongside front and rear baskets perfect for carrying groceries or cargo. Powered by a reliable lithium-ion battery and a brushless rear motor, this tricycle offers a smooth, quiet ride with pedal assist to make tackling hills and longer distances effortless.
