Product Overview

Efficiency in Motion

This electric powered wheelbarrow streamlines material transport for construction, landscaping, and agricultural sites. Featuring a robust 500W brushless motor, it significantly reduces manual strain while maintaining a high load capacity of 150kg. Its variable speed control and all-terrain tire design ensure smooth maneuverability across various working environments.

Reverse	2.5 km/h

Unit Weight	40 kg
Wheel Specification	4.00-10

Key Features

Standard Features

- Brushless motor drive
- Variable speed control
- Safety start switch
- High-density tub material
- Ergonomic handle design
