

Electric PTC Tower Heater with Remote Control

This electric tower heater utilizes PTC (Positive Temperature Coefficient) technology for efficient and safe heating. It features adjustable power settings, oscillation, a timer, and a remote control for convenient operation.

Overview

Efficient PTC Heating Solution

This tower-style electric heater utilizes advanced Positive Temperature Coefficient (PTC) technology to deliver efficient, safe, and consistent warmth for indoor environments. Designed for user convenience, it features intuitive controls including adjustable heating modes, a programmable timer, and oscillation functionality. The sleek black and silver finish, combined with a stable base and protective grill, makes it a reliable and professional choice for various indoor heating applications.

Technical Specifications

Heating Technology	PTC (Positive Temperature Coefficient)
Form Factor	Tower
Oscillation	Yes

Control & Operation

Available Modes

- High
- Low
- Auto

Timer Increments (Hours)

- 0.5
- 1
- 2
- 4

Control Methods	Push Buttons, Rotary Dial, Remote Control
-----------------	---

Safety & Build

Finish

Black • Silver

Recommended Usage	Indoor
