

Electric Quartz Infrared Patio Heater

This electric patio heater is designed for outdoor use. It utilizes quartz infrared technology to provide efficient and directional heating.

Product Overview

Efficient Outdoor Heating

The Electric Quartz Infrared Patio Heater provides highly efficient, directional warmth, making it an ideal solution for patios, balconies, and other outdoor spaces. Designed for comfort and convenience, it features silent operation and an adjustable thermostat to easily manage your environment. With its robust ferric telescopic stand and IP44 weather-resistant rating, this heater offers both stability and durability for cooler weather conditions.

Technical Specifications
