

Electric Rammer Compactor

This rammer is a robust compaction tool suited for construction and landscaping. Its electric motor delivers high-impact force for effective soil compaction.

Overview

High-Performance Electric Rammer Compactor

This professional-grade electric rammer compactor is engineered for reliable soil compaction in confined spaces such as trenches and foundation perimeters. Utilizing a high-output electric power system, it delivers consistent impact force to effectively compact both granular and cohesive soil types. Designed with operator ergonomics in mind, the unit features a robust frame and durable base plate to ensure long-term performance and reduced fatigue during extended operation.

Technical Specifications

Model Specifications Comparison

Model	Power (kW)	Impact Force (kN)	Weight (kg)
HCD70	2.5	17	75
HCD70B	2.5	16	75
HCD100	3	20	90

Power Supply

380V / 50Hz
