

Electric Range Stainless Steel Coil Heating Element

Replacement electric range surface element made from durable stainless steel. This coil heater provides consistent and even heat distribution for cooking.

Product Overview

High-Performance Electric Range Surface Element

This electric range surface heating element is engineered for reliable and consistent cooking performance. Constructed from high-grade SUS309S stainless steel, it ensures excellent thermal transfer and long-lasting durability. The coil design features an efficient multi-loop geometry supported by a central reflector for stability and even heat distribution.

Electrical Specifications

Power Rating

1795 W

Minimum Power

2400 W

Maximum Power

Operating Voltage

208-240V

Technical Details

Sheath Material

SUS309S Stainless Steel

Resistance Wire Alloy

Cr20Ni80

Packaging and Logistics

Internal Part Number

SHM23025

Packaging Specifications

Metric	Detail
Quantity per Carton	16 PCS
Carton Dimensions	515 x 415 x 350 mm
