

Electric Rechargeable Ultrasonic Toothbrush

This electric toothbrush utilizes ultrasonic technology to promote effective dental cleaning. Its design includes a replaceable brush head and a compact charging base for convenient use.

Product Overview

Professional Ultrasonic Cleaning

This electric rechargeable ultrasonic toothbrush utilizes high-frequency vibrations to provide a comprehensive cleaning experience. Its compact and ergonomic design ensures comfortable handling, while the replaceable brush head system promotes better hygiene and long-term utility. Perfectly suited for daily oral care, the device includes a dedicated charging base to maintain power levels for consistent performance.

Technical Specifications

Power Source	Rechargeable Battery
Charging Base	Yes

Design Features

Build Style	Compact cylindrical body
