

Electric Red Rice Cooker with Non-Stick Pot

This electric rice cooker is designed for household use, especially for cooking red rice. It features a non-stick inner pot and an automatic keep-warm function.

Product Overview

Efficient and Durable Rice Cooking

This electric rice cooker is designed for household use, offering a reliable solution for cooking various types of rice. It features a durable, special metal construction that promotes environmental health and longevity. With a user-friendly one-touch operation and micro-pressure spill structure, it ensures consistent results and easy maintenance.

Key Features

Core Functionality

- Non-stick inner pot
- Automatic keep-warm function
- Micro-switch operation
- Temperature sensitive controls
- Full three-dimensional insulation

Design Highlights

Floral pattern exterior, Indicator lights, Micro-pressure spill structure

Technical Specifications

Heating System

High quality insoluble heating element

Continuous Operation

24 hours
