Overview

Professional Two-Post Vehicle Lift

This electric release two-post car lift is engineered for efficiency and safety in automotive repair environments. Featuring an automatic arm locking system and built-in motor overload protection, it ensures reliable operation for daily workshop tasks. Its floor plate design makes it an ideal solution for facilities with height restrictions, while the cable leveling system guarantees synchronization regardless of load distribution.

Performance Metrics

Lifting Capacity

4080 kg
Rated Capacity

Operational Timing

Operation	Time
Lifting Time	55-65s
Lowering Time	50s

Dimensions

Physical Dimensions

- Max lifting height: 1850mm
- Overall height: 2900mm
- Overall width: 3605mm
- Width between columns: 2795mm

Safety & Features

Safety Features

Mechanical safeties, Automatic engagement, Motor overload protection, Automatic height stop, Hydraulic cylinder protector, Overhead shut-off

Technical Specifications

Quality Testing

Dynamic test: 115% capacity • Static test: 150% capacity

Power Supply

110V/220V/380V 50HZ/60HZ 1PH/3PH
