

Electric Rice Cooker with Dual Inner Pots

This electric rice cooker is designed for household use. It features two inner pots, one for cooking rice and another for preparing soup.

Product Overview

FSX-6 Series Versatility

The FSX-6 Series electric rice cooker is engineered for efficiency and superior taste, featuring a unique dual-pot system. By utilizing specialized purple clay pots for both rice and soup, it ensures optimal cooking results for different food types. Its advanced levitation and hermetic heating structure significantly improve thermal efficiency, making it an energy-saving addition to any kitchen.

Key Features

Cooking Functions

- Dedicated rice cooking
- Dedicated soup cooking
