Product Overview

Seamless Vehicle Accessibility

These electric power running boards are motorized, retractable steps designed to automatically deploy when vehicle doors open and retract when closed. Engineered for high-riding vehicles like trucks and SUVs, they provide a safe, convenient entry and exit point, particularly useful for passengers with mobility challenges. The system maintains the vehicle's aerodynamics and ground clearance while offering a sleek, integrated appearance when not in use.

Compatibility & Fitment

Compatible Models

Toyota Fortuner, Toyota Tundra, Toyota Revo, Toyota Vigo

Technical Specifications

Surface Features

Non-slip surface • All-weather reliable

Construction Material

Aluminum alloy

Mechanism

Electric motor with door sensor control

Installation

Included Components

- Wiring harness
- Mounting hardware
- Electric motor system
