

Electric Scooter for Urban Commuting

This electric scooter is a compact and lightweight personal transportation device ideal for urban commuting. It features a durable frame, a rechargeable battery, and a foldable design for easy storage.

Overview

Urban Mobility Solution

The CD01 Electric Scooter is a compact and lightweight personal transportation device engineered specifically for efficient urban commuting and recreational use. It features a durable, foldable frame that ensures easy storage and portability, making it an ideal choice for short to medium-distance travel. With an integrated electronic system for smooth acceleration and safety-focused design elements like a non-slip deck and rear foot brake, this scooter provides a reliable, eco-friendly alternative to traditional transit.
