

Electric Scooter for Urban Commuting

This electric scooter is designed for urban commuting. It features a sleek, aerodynamic body and provides efficient, eco-friendly transportation with its high-torque electric motor and long-lasting battery.

Overview

Urban Commuting Solution

This modern electric scooter is engineered specifically for efficient urban commuting. It features a sleek, aerodynamic design with a durable, lightweight chassis for improved handling. The quiet, eco-friendly electric powertrain minimizes emissions while offering reliable performance for navigating busy city streets.

Design & Build

Color Scheme	White and black with bronze trim
Chassis Construction	Lightweight materials

Performance

Emission Status	Eco-friendly • Zero Emission
Motor Type	High-torque electric motor

Features

Key Features

- Digital display
- LED lighting
- Disc brakes
- Comfortable seat
- Side stand
- Integrated storage
