Product Overview

Industrial Electric Screwdriver SC500

The SC500 is a high-performance electric screwdriver specifically engineered for rigorous industrial applications. Featuring a robust motor and adjustable torque settings, it provides consistent and reliable precision for demanding tasks. Its ergonomic grip ensures operator comfort during extended use on assembly lines or maintenance projects.

Technical Specifications

Design Features

- Robust motor for continuous operation
- Ergonomic grip for reduced fatigue
- High-precision driving mechanism

Torque Management	Yes
Primary Applications	Assembly Lines, Construction Sites, Industrial Maintenance
