

Electric Security Patrol Vehicle

Electric patrol car designed for security and surveillance purposes. It features a compact design, open-air cabin, and police livery.

Overview

Eco-Friendly Security Patrol Solution

This electric patrol vehicle is designed as a versatile, eco-friendly alternative to foot patrols in closed communities, campuses, ports, airports, and administrative departments. Available in both open and closed configurations, the vehicle operates with zero emissions and minimal noise, ensuring non-disruptive surveillance. Each unit comes fully equipped with essential patrol features, including emergency lighting, loudspeaker systems, and integrated audio capabilities to enhance security operations.
