Product Overview

Efficient Footwear Care

This electric shoe dryer is designed to dehumidify, dry, and sterilize footwear, ensuring comfort and hygiene. It utilizes a combination of constant temperature heating, UV light for bacteria elimination, and internal fans for efficient airflow. Constructed from high-temperature resistant, environment-friendly PP plastic, this device is a safe and reliable solution for maintaining shoe freshness.

Technical Specifications

Key Performance Metrics

40 W Power Rating	250 V Max Voltage	8 hours Max Drying Cycle
