

Electric Sightseeing Vehicle with Canopy and Cargo Bed

This electric sightseeing vehicle is designed for transporting people in resorts and parks. It features a canopy for weather protection, a windshield for safety, and a rear cargo bed for carrying items.

Overview

Designed for Versatility and Comfort

This electric sightseeing vehicle is engineered for efficient passenger and light cargo transport in resorts, parks, and recreational facilities. Featuring a protective canopy and windshield, it ensures rider comfort in various weather conditions while maintaining safety. The integrated rear cargo bed adds utility, making it perfect for guided tours or facility logistics. Powered by an electric motor, it offers a quiet, emission-free, and user-friendly transportation solution.
